## The Solvay Solution

Fixvision proudly presents the first 360° Escape Room for Immersive Rooms: The Solvay Solution. An immersive game where interactive elements, real actors, 3D animation, surround sound, and intense time pressure create an impressive gaming and learning experience

## The Theme

Players find themselves in the year 1927. They are held captive in the sinister 14th-century Solvay Castle, where a group of famous scientists, including Albert Einstein and Marie Curie, just participated in the 5th Solvay Conference. During this renowned gathering, the focus was primarily on the new quantum theory, but stories also circulate about peculiar physics experiments in the lower chambers of the castle.

## The Escape

Due to a mysterious accident, something has gone awry with the connection between time and space.

As a result, players are tossed back and forth between reality and fiction. They must collaborate and think critically. By solving a variety of puzzles and answering quiz questions, participants ultimately reach a time machine.

If they manage to activate it and withstand the time pressure, they can return to the present.

## An Educational Template

The strength of 'Solvay Solution' lies in the fact that the game has been fully developed as a template with a fixed structure and game theme as its foundation. Within it, all questions, answers, and puzzle elements can be easily customized by the subject teacher and/or game master. Photo and image files can be effortlessly copied to a folder on the computer.

Modifying and adding text can be done easily using a clear quiz form.

This transforms this immersive experience into a teaching tool that can be played again and again, each time differently. It can be used in all school subjects to gamify course material and make it an exciting experience.

## Manual

The accompanying manual provides clear instructions on how to play the game.

The structure is made understandable, and a step-by-step explanation is given on how the game can be customized.

## Duration

The 'Solvay Solution' can be played in a short 20-minute experience or in a complete 45-minute experience.

## In Short:

- 6 types of puzzles
- Customizable content
- Unique learning environment
- Play with teams
- Entertaining
- Challenging
- 360° full Immersive experience
- Surround Sound
